

Mobile Network Protocol Stacks

LTE/5G Radio Access Network Architecture

📄 User Plane (Data Traffic)

📡 Control Plane (Signaling)

Mobile Network Protocol Stacks

LTE/5G Radio Access Network Architecture

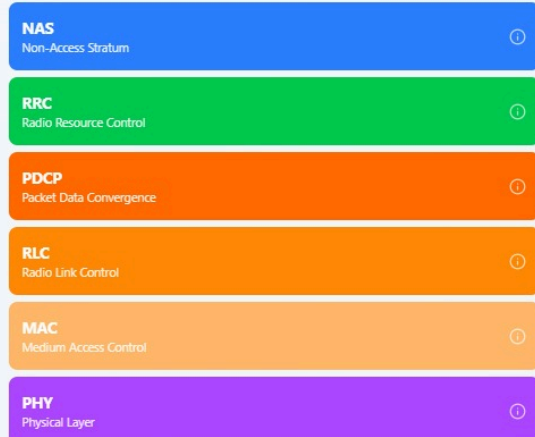

📄 User Plane (Data Traffic)

Application Layer (APP)

User applications (web, video, messaging)

📡 Control Plane (Signaling)

Packet Data Convergence (PDCP)

Security for control messages

Network Architecture

UE (User Equipment)

Mobile device with protocol stack implementation for communication with the network

eNodeB / gNodeB

Base station providing radio interface and managing radio resources (LTE/5G)

Core Network

EPC (4G) or 5GC (5G) handling mobility, sessions, and external connectivity
