CollabBoard Mobile App

Wireframe Prototype - Creative Collaboration Platform

Key Features

Real-time Collaboration
Multiple users can work simultaneously on the same canvas with live updates

Live Cursors
See where teammates are working with animated cursor indicators

Comments & Reactions
Add contextual feedback directly on canvas elements

Mobile-First Design
Optimized touch interactions for mobile whiteboarding

Wireframe Screens

1. Home / Dashboard →
View recent boards, create new boards, see active collaborators

2. Active Board Canvas →
Main whiteboard view with tools, real-time collaboration, and peer interactions

Peer-to-Peer Interactions Demonstrated

- **Live User Presence:** Active collaborators shown with avatars and status indicators
- **Animated Cursors:** Real-time cursor movements from other users
- **Object Creation:** See elements appear as teammates add them to the canvas
- **Activity Feed:** Live updates showing who's doing what
- **Collaborative Editing:** Multiple users can select and edit different objects simultaneously

Viewing "Team Brainstorm"
Design Notes:
• Real-time updates: Board status changes instantly when collaborators join/leave
• Visual indicators: Active boards highlighted, online status shown
• Touch-optimized: Large tap targets for mobile interaction
• Presence awareness: See who's working on what board
